SUMMARY

Senior Product Designer and UX strategist with 15+ years of experience delivering user-centered design across B2B SaaS, automotive, financial services, life sciences, pharmaceutical, insurance, and healthcare. Proven ability to lead end-to-end design, from generative research and information architecture through interaction design, prototyping, and design system governance. Certified Usability Analyst (CUA #2014-4937) with deep expertise in usability testing, field research, and translating qualitative insights into measurable product outcomes. Comfortable operating at the boundary of design and front-end development (HTML, CSS, JavaScript, React) and designing for AI-assisted workflows. Portfolio: jarroldmurray.com

EXPERIENCE

Director of Product & UX | Captivated |

05/2022 – 05/2026

- Led end-to-end product design and UX strategy for a B2B SaaS communications platform, driving information architecture, interaction design, usability testing, and design system governance across a full platform modernization
- Owned product roadmap, feature prioritization, and acceptance criteria as Product Owner across multiple initiatives
- Designed and implemented a scalable AI-ready documentation framework, replacing traditional user stories with structured Capability Briefs that improved engineering clarity and accelerated AI-assisted development
- Led enterprise identity and authentication design, including identity-first login flows, SSO, MFA enforcement, multi-org context switching, and activity-based session management
- Conducted competitive analysis, defined naming strategy, and designed a next-generation website conversation entry point, API-first, compliance-aware, with AI-assisted routing
- Facilitated all Scrum ceremonies as Scrum Master and introduced Agile methodologies to improve delivery predictability
- Built and operationalized a product analytics platform to track user behavior and inform iterative design decisions

Senior UX Researcher | Driven Data |

04/2021 – 05/2022

- Designed a B2B SaaS analytics platform helping automotive dealerships track and optimize advertising performance, replacing a legacy Klipfolio dashboard with a purpose-built, research-informed tool
- Led end-to-end mixed-methods research strategy including generative interviews, usability testing, and synthesis
- Elevated organizational research maturity through documentation, education, and cross-functional collaboration
- Expanded into Product Ownership as the company scaled through a funding round and eventual acquisition

Senior UX Designer (Consultant) | Onebridge |

03/2020 – 04/2021

- Designed an AI/ML-powered clinical trial search engine for a Fortune 500 pharmaceutical company, enabling researchers to query a massive document corpus in plain language
- Designed an executive data visualization dashboard used to evaluate drug trial performance and inform funding decisions across competing research programs
- Supported early UX research for a COVID-19 response application
- Delivered high-fidelity mockups and interactive prototypes that served as the primary handoff artifacts for engineering teams working on accelerated timelines

UX Lead | Brooks Life Sciences |

04/2019 – 03/2020

- Hired as the company's first UX employee, established a UX practice from scratch including research operations, usability testing protocols, and design system governance for a life sciences informatics platform
- Led UX strategy and design for a ground-up LIMS replacement, a complex data entry and sample tracking system managing bio-samples with up to 100 data points each across warehouse freezer systems
- Created and governed a design system and component library to ensure consistency across modules
- Conducted qualitative and quantitative research and translated findings into strategic recommendations that shaped product direction

Senior UX Designer | Cox Automotive / NextGear Capital |

03/2017 – 04/2019

- Conducted field research with independently owned automotive dealerships to inform product decisions for a B2B floor plan financing platform
- Designed internal tools for title tracking and risk analysis, and a dealer-facing mobile app for purchasing and paying off vehicle titles
- Supported 8-10 development teams as a centralized UX resource, gathering requirements, designing workflows, and conducting usability testing
- Documented design system usage guidelines and interaction standards to ensure consistency across the platform

UX Designer III | Seven Corners |

12/2015 – 03/2017

- Hired as the company's first UX employee, led end-to-end experience design for a legacy system spanning policies, groups, members, claims, and adjudications
- Redesigned the online claims submission workflow end-to-end, reducing processing time from 30-45 days to under a week, handling claims in one-third of the previous time
- Conducted heuristic evaluations, stakeholder interviews, and usability testing with internal users to surface and resolve systemic workflow issues

Experience Architect / UX Developer | Fusion Alliance |

02/2014 – 12/2015

- Delivered project-based UX and front-end development across an unusually wide array of industries, including a major healthcare insurer's Sitecore CMS, a planning application for funeral service providers, a route-planning iOS app for federal security personnel, and wearable technology exploration for industrial data entry
- Wrote front-end HTML, CSS, and JavaScript, working hands-on alongside engineering and significantly expanding development proficiency
- Defined cross-channel experience strategies and delivered interaction design solutions for large enterprise clients across healthcare, government, and professional services

UI/UX Designer & Interaction Designer | Dominion Dealer Solutions |

12/2010 – 02/2014

- Joined on a 3-month contract and was offered a full-time role within two weeks, designed interfaces for one of five legacy automotive applications being unified into a single SaaS platform
- Collaborated across product, engineering, and business teams to translate requirements into intuitive web interfaces and interactive prototypes
- Transitioned from print-based design into web and application design, developing interaction design skills and front-end fluency working alongside cross-functional engineering teams

CORE COMPETENCIES

User Research & Usability Testing | Heuristic Evaluation | Journey Mapping & Persona Development | Information Architecture | Cross-Functional Leadership & Stakeholder Communication | Product Strategy & Roadmapping | Agile Methodologies & Scrum Facilitation | AI-Assisted Development & Documentation | Interaction Design & Prototyping | Wireframing & High-Fidelity Mockups | Design Systems & Component Libraries | Front-End Development (HTML, CSS, JavaScript, React, Ant Design, Material UI) | Figma | AI Tools (Claude, ChatGPT, Figma Make)

INDUSTRY EXPERIENCE

B2B SaaS | Automotive | Financial Services | Life Sciences | Pharmaceutical | Travel Insurance | Healthcare | Federal / Government | Online Education | Digital Media

EDUCATION & CERTIFICATIONS

BFA, Emphasis in Graphic Design | Ball State University, Muncie, IN | 2001

Certified Usability Analyst (CUA) | Human Factors International | CUA #2014-4937 | 2014

Formal certification in user research methods, usability testing, and human-centered design.
