

Stakeholder Interview Report

– Online Claims Submission (TripCan) –

Jarrold Murray

UX Designer III

November 18, 2016

Laura W.

- Upon submission, create the claim, occurrence(s), and attach any scanned documents appropriately
- Accumulators (\$1.00 to start?)
- Allow analysts to do the calculations in AXIS (the functionality is broken currently)
- System generated payment letter – notifying the member online
- Allow ACH/wire transfer payments (not possible with all TripCan policies)

Ryan B.

- Can we find a competitive advantage?

Sureleen S.

- Require member login
- Create an electronic version of Proof of Loss form – required fields
- Display the items needed – provided details and reasons why this information is required
- Online access to the kinship form
- Bypass the need for HelpDesk
- Can we monopolize the TripCan offering?
- Likes the possibilities of a mobile app – scan from airport
- FastTrack claims – submit photos with OCR
- “OAG” software can tell us about flight delays (through calls)
- Is there a way to get money to the insured at the airport for any expenses they need – we know if flight delay warrants a hotel stay

Justin T.

- How can we use Partner Branding?
- Get agents involved.

Jim K.

- Competitive Analysis: Allianz Europe
- Competitive Analysis: Berkshire Hathaway's "Tarmac Insurance"
- Integration opportunities with GDS software like Sabre?
- The goal for 2016 was to reduce cost per claim by 20%
- Competitive Analysis: en.aprilinternational.com
- Competitive Analysis: intrepid247.com
- Competitive Analysis: TravelGuard
- See what our competitors are doing

Michael S.

- Validate data at every step – be mindful of 837 regulations

Kyle B.

- Utilize DropZone for easy document submission
- Tag documents as they are uploaded (ex: proof of loss, passport, etc)
- Automate the process where logical through APIs
- Auto-generated claims using geo-location and airline tracking apps

Amy B.

- Icon driven design
- Define the touches between member and analyst
- Assign an Advocate – personalize the claims process
- Example: Uber uses OCR technology to read credit card numbers
- Automate how claims are entered into AXIS
- Reduce the number of days of claims processing from 10 to 2?
- Look into "Auto-adjudication"
- Focus on education and customer service

Andrew P.

- Banking Information in MyAccount
- Automate banking verification
- TripCan is almost 100% check – write logic based off carrier???

Jarrold M.

- Intuitive... easy to use... this isn't a process people do repeatedly. It must be easy.
- Automate as many processes as possible...lowering the time needed...thereby lowering the cost per claim
- Instant feedback to user – the system(s) should always notify users what is happening and what is needed from them
- Bridge data gaps between AXIS, MyAccount, and the member... reducing the number of emails and phone calls
