

Jarrod W. Murray

The gap between design, product, and engineering is where I do my best work.

Experience

Director of Product/UX *Captivated (5/22–5/26)*

- Drove product vision, strategy, and roadmap across a full platform modernization — replacing a monolith Ember application with a modular React architecture using the strangler pattern
- Served simultaneously as Product Owner, Scrum Master, and UX Lead across multiple initiatives
- Designed a scalable product documentation framework that replaced traditional user stories with structured, AI-ready Capability Briefs, improving engineering clarity and reducing implementation questions
- Led enterprise authentication design across multiple capability areas including identity-first login, SSO, MFA, and session management — establishing a foundation for enterprise growth
- Drove competitive analysis, naming strategy, and system design for a next-generation website messaging entry point built API-first for enterprise scale
- Built and operationalized a product analytics platform to understand user behavior and inform roadmap decisions
- Championed Agile methodologies and facilitated all Scrum ceremonies to improve delivery predictability and team cadence
- Maintained and scaled a user research database to support ongoing insights work across product and design

Sr. UX Researcher *Driven Data (4/21–5/22)*

- Led end-to-end research strategy including goals, hypotheses, participant selection, and mixed-methods execution
- Elevated research maturity across the organization through education, documentation, and inclusive practices
- Translated insights into compelling, actionable recommendations that shaped product direction for cross-functional teams
- Built a data-driven design culture by integrating research findings, analytics, and product goals into a single decision-making workflow
- Identified new product opportunities by uncovering user motivations and aligning them with business needs
- Established a centralized research participant and insights repository to support ongoing studies

Sr. UX Designer (Consultant) *Onebridge (3/20–4/21)*

- Collaborated with product, engineering, and business teams to ensure usability, consistency, and alignment with delivery scope
- Simplified complex data and workflows into intuitive user experiences across multiple client engagements
- Conducted user interviews, surveys, and usability tests — synthesizing insights into design improvements
- Produced high-quality designs and prototypes to support client deliverables on accelerated timelines

UX Lead *Brooks Life Sciences (4/19–3/20)*

- Defined and implemented UX strategy for Informatics R&D products from the ground up
- Created and governed a design system and pattern library to ensure product consistency across engineering teams
- Partnered with Product Owners, engineering, and business stakeholders to align features with user needs
- Conducted qualitative and quantitative research and translated insights into strategic recommendations that shaped product direction

Sr. UX Designer *Cox Automotive, Inc./NextGear Capital (3/17–4/19)*

- Built and maintained a design system to ensure consistency across a suite of financial products
- Gathered and synthesized requirements across business, product, and engineering teams
- Developed prototypes to validate concepts and support cross-functional alignment
- Coordinated and executed user testing to inform iterative design improvements

Experience Continued

UX Designer III *Seven Corners* (12/15–3/17)

- Led end-to-end UX efforts and championed user-centered design across insurance product lines
- Conducted heuristic evaluations, interviews, and user testing to identify and resolve usability issues
- Captured requirements through contextual inquiry and job shadowing
- Developed a pattern library and ensured consistent adoption across teams

Experience Architect/UX Developer (Consultant) *Fusion Alliance* (2/14–12/15)

- Defined cross-channel experience strategies for large-scale client projects
- Conducted user research and requirements discovery to shape product direction
- Designed interactive prototypes and delivered user-centered interface solutions across multiple digital platforms

UI/UX Designer/Interaction Designer *Dominion Enterprises* (12/10–2/14)

- Translated requirements into intuitive interfaces and interactive prototypes
- Conducted user testing to validate designs and uncover usability issues
- Collaborated with designers and communicated UX specifications to development teams

Areas of Expertise

- Product Strategy & Systems Thinking
- Capability Brief Framework Design
- Enterprise Product Architecture
- AI-Assisted Development & Documentation
- API-First Product Design
- Compliance & Consent Modeling (TCPA/TCR)
- User Interviews & Mixed-Methods Research
- Usability Testing & Heuristic Evaluations
- Research Ops & Insights Repository Management
- Data Analysis, Analytics Interpretation & A/B Testing
- Persona Creation, Journey Mapping & Information Architecture
- Wireframing, Prototyping & Interaction Design
- Design Systems & Pattern Library Governance
- User-Centered Design & Accessibility Principles
- Product Roadmapping, Prioritization & Acceptance Criteria
- Agile Methodologies, Scrum Facilitation & Backlog Management
- Cross-Functional Leadership & Stakeholder Communication
- Front-End Development & Responsive Design

Education & Certifications

BFA, Emphasis in Graphic Design — Ball State University, Muncie, IN: May 2001

Certified Usability Analyst (CUA) — Human Factors International, 2014
formal certification in user research methods, usability testing, and human-centered design
CUA #2014-4937
